

Dear GoBolt,

I am writing to express my genuine interest in the IT Analyst position at GoBolt. With a CompTIA A+ certification, four years of experience in the startup tech sector, and a proven track record in project management and technical support, I am excited about the prospect of contributing to your world-class team.

### Why Me?

- Extensive experience in core IT functions: ensuring delivery of technology to support business operations.
- Successfully managed technical projects at Uberflip, ensuring the timely delivery of custom enterprise SaaS solutions.
- Excelled as an Engineering Talent Acquisition Specialist at BenchSci, delivering 10+ top-tier hires for a Google-backed ML startup.
- Served as a Senior Specialist at BrainStation, providing frontline support for events and courses, and ensured delivery through on-call technical and facilities support.
- Passed A+ certification last week with less than 1hr of dedicated study, relying instead on existing knowledge. Currently preparing for Network+ and Server+ exams, anticipating completion within the coming weeks.

### Key Attributes:

- **I'm a people person.** Although I love technology, I understand a businesses greatest attribute is its people. I understand that the most important trait of an IT professional is to be an effective communicator and collaborator.
- A lifelong passion for IT. I built my first PC at 15 and have been hooked ever since. I have a deep curiosity for building, tinkering, breaking, and fixing all types of software and hardware systems.
- Strong fundamental technical skills beyond IT. I know a bit about electrical, HVAC, and plumbing systems. I like working on cars, drones, and vintage electronics. **I own a lot of tools, and I love using them.**

### Why GoBolt?

My personal interests all crossover around the points of electrification, and the logistics of the digital economy. Your team and platform appear to be world-class, and well-aligned with my skills and professional aspirations.

Thank you for considering my application. I look forward to the possibility of discussing my candidacy further.

Cheers,

Ben Taylor
